The image on the cover of this report was designed by Erik Adigard of M-A-D. He designed it and the other images in the Collideroscope series to illustrate David Howes' *The Sensory Studies Manifesto: Tracking the Sensorial Revolution in the Arts and Human Sciences*, published in November 2022. To read more about the thinking behind the Collideroscope series see: <http://www.sensorystudies.org/picture-gallery/collideroscope1-erik-adigard/>

1 INTRODUCTION

The Centre for Sensory Studies (CSS) was constituted as a faculty research centre (Arts and Science) in January 2012. It received recognition as a university research centre (emergent category) in April 2016. In the Spring of 2020, the Centre’s status as a university research centre was renewed for a further six years and the CSS was promoted from the emergent to the established category. Here are some of the highlights of the 2022-2023 academic year:

The Centre welcomed two new faculty members: Sowparnika Balaswaminathan (Religions and Cultures) and VK Preston (History), both of whom presented on their work in the context of the Talking Sense seminar series. We also welcomed two new junior fellows, Chantale Laplante and Hubert Gendron-Blais, who are primarily active in the Transgressive Sounds and Atmospheres working group.

We are delighted to announce that Senior Fellow Florian Grond was hired as an Assistant Professor in the Department of Design and Computation Arts, effective 1 July 2023, and Kelly Keenan (who defended her INDI MA thesis, entitled "Anatomical Imaginaries: Relational embodiments of anatomical discourse in contemporary dance training" in August 2022) was hired as a Professeure en pratiques artistiques by the Département de danse at UQÀM in December 2022. We wish both of them all the best in their new academic careers.

Congratulations to Ari Soulikias who was named a Public Scholar for 2022-2023, and Paula Bath who will succeed him for 2023-2024. Congratulations to Adela Goldbard for being awarded a FRQSC Doctoral Fellowship and to Craig Farkash for receiving a SSHRC Doctoral Fellowship in addition to being selected for a FRQNT internship tenable at ExperiSens, as well as Rodrigo D’Alcantara for winning the 2022 Elspeth McConnel Fine Arts Award.

A record eleven students completed their degree requirements this past year: Alexandre Saunier, Genevieve Collins, Olya Zikrata, Sylvain Lavoie, Felicity Hamer, Elisabeth Roy-Trudel, Carmen Ruschiensky, Gabriel Peña, Kelly Grant, Kelly Keenan, and Jessie Stainton. Five new students joined the Centre in 2022-2023 (three Ph.D. and two M.A).

The Centre hosted the SENSATION Virtual Lecture series (four talks via zoom) during the 2022 Fall term. The major event of the year was the fourth conference in the Uncommon Senses series – namely, “Uncommon Senses IV: Sensory Ecologies, Economies, and Aesthetics,” which ran from 3-6 May 2023. The conference attracted 260 registered participants, the majority of whom

were able to attend in person. This was a welcome change from Uncommon Senses III in May 2021, which had to be an on-line only event due to the pandemic.

The Centre hosted a launch for books by three of its members on 6 December 2022: *Locative Tourism Applications* by Erin Lynch, *The Sensory Studies Manifesto* by David Howes, and Harold A. Innis' *Empire and Communications*, edited and introduced by Bill Buxton. The Centre also co-sponsored a launch for a second book by David Howes, *Sensorial Investigations*, in association with the McGill Centre for Human Rights and Legal Pluralism, at McGill University on 10 May 2023.

Centre members (faculty and fellows) published 8 books. Constance Classen enjoyed the honour of having her book, *Worlds of Sense* (1993), reissued by Routledge as a volume in its Routledge Revivals series. Centre members (including students) otherwise brought out 1 thematic issue of a journal, 33 chapters in books and/or journal articles, and presented 102 conference papers or invited talks as well as 3 exhibitions.

Centre members, singly and/or in teams, submitted 21 new grant applications, 11 of which were successful and 4 remain pending for a total of \$91,390 (internal funds + internal applicant: \$12,390; external funds + internal applicant: \$79,000). Centre members were listed as co-applicants or collaborators on 5 team grant applications to both national and international funding agencies submitted by external (to Concordia) applicants, 2 of which were successful, while 3 remain pending, for a total of \$1,913,935.

Chris Salter left Concordia in May 2022 to assume a professorship and the directorship of Immersive Arts Space at Zurich University of the Arts (ZHdK), Zurich, Switzerland, but it is as if he never left, for he remains a Member Emeritus of the Centre, continues to direct numerous graduate students, presented a paper at Uncommon Senses IV, and scored a \$1,400,000 grant from the Swiss National Science Foundation. The “Probing XR’s Futures” project team includes David Howes as one of five co-investigators and INDI PhD student Puneet Jain as a doctoral fellow and research assistant.

We bid farewell to Solene Froidevaux, who was a CSS visiting scholar during the 2022-2023 academic year, supported by a postdoctoral fellowship from the Swiss Government, and to Carmela Cucuzzella, who has just been appointed Dean of the Faculty of Environmental Design at the Université de Montréal.

Finally, in a very exciting and promising development, on 5 May 2023, the Centre, represented by David Howes, signed an Agreement of Friendship and Cooperation with the Kobe Institute for Atmospheric Studies (KOIAS), represented by Yuho Hisayama.

-----------	--------	-------------	----------	--------------	--------------------------------------

3 FUNDING

- The following list does not reflect all of the grant activity of Centre members. It only lists those research projects which fall within the domain of sensory studies.
- The gaps in the enumeration are due either to a project having come to an end or to a grant application not being successful.
- Each application or grant is distinguished by its focus and the axis or cluster to which it belongs. The four foci derive from the 2020 Development Plan (discussed further in the final section of this Report). The axes and clusters derive from the period when the Centre became a university research centre.

KEY

FOCUS (FROM 2020 ON)

- Focus 1 – Sensory Education
- Focus 2 – Exhibition (Multimodal Arts & Museology)
- Focus 3 – Sensory Design
- Focus 4 – Sensory Urbanism

AXES (FROM 2016 ON)

- Axis 1 – Culture & the Senses
- Axis 2 – Multisensory Aesthetics
- Axis 3 – Sensory Design & Marketing
- Axis 4 – Sensory Engineering & Communication

CLUSTERS (EMERGENT)

- Cluster A – Law & the Senses
- Cluster B – Emplacement
- Cluster C – Disability & the Senses
- Cluster D – Gender & the Senses
- Cluster E – Materiality & Immateriality
- Cluster F – Smartness, the Sensor Society & Sentient Ecologies

3.1 New Research Grants and Applications

- \$ 12,390 Internal Funding – Concordia PI †
- \$ 79,000 External Funding – Concordia PI ††
- \$ 506,310 External Funding – External PI †††
- \$ 1,407,625 External Funding – Internal–External PI (Salter)

- \$ 2,005,325 TOTAL

§ 126 “Bruit, Environnement sonore et santé, “ Programme reseau thématique, Fonds de Recherche du Québec – Société et Culture. Principal Investigator: Catherine Guastavino (McGill), team of 47 researchers from 15 institutions in Quebec, including Concordia, represented by **David Howes**. Competition in 3 stages: the project passed the first (Notification of Intent) and second (Letter of Intent) steps of the selection process and is currently working in the third stage, full application due in June 2023. \$4,000,000.

[Axis 1 + Cluster B + Focus 3 & 4] †††
[Pending]

§ 125 “Crafting Subjects: Aesthetics, Ethics, & Labour in the Neoliberal Nation”. Insight Development, Social Sciences and Humanities Research Council. Principal Investigator: **Sowparnika Balaswaminathan**. \$50,562.

[Axis 2 + Focus 2] ††
[Pending]

§ 124 “Participatory evaluations of audio haptic assistive technology designs, modelling and replacing visual information with auditory/haptic cues.” Vision Science to Applications (VISTA) - funded by the Canada First Research Excellence Fund, administered by York University. Principal Investigator: Shital Desai (York). Co-investigators: Laurence Harris (York), Jeremy Cooperstock (McGill) and **Florian Grond**. \$50,000

[Axis 4 + Cluster F + Focus 3] †††
[Pending]

§ 122 “Uncommon Senses IV conference.” Dean’s Office, Faculty of Fine Arts. Principal Applicant: **David Howes**. \$400.

[2023]

§ 121 “Uncommon Senses IV conference.” Dean’s Special Initiative Funding, Faculty of Arts and Science. Principal Applicant: Geneviève Sicotte. \$750.

[2023]

§ 120 “Uncommon Senses IV conference.” Aid to Research Related Events, Office of the Vice-Provost Research and Graduate Studies. Principal Applicant: Geneviève Sicotte. \$1240

[2023]

§ 119 “Sensing Differently.” Insight Development Grant (IDG), Social Sciences and Humanities Research Council. Principal Investigator: **Florian Grond**. Co-investigators: **David Howes**, **Melissa Park** (CSS Affiliate Member/McGill), **Matthew Unger**. \$72,000.

[Axis 2 + Cluster C + Focus 3] ††

[2023-2025]

§ 118 “Food Studies Working Group,” Working Group program, Centre for Interdisciplinary Studies in Society and Culture (CISSC). Principal Investigator: **Jordan LeBel**. Co-investigators: **Geneviève Sicotte** and 8 others. \$2,000

[Axis 1 + Focus 3] †

[2023-2024]

§ 117 Clandestine Transactions Working Group. Working Group programme, Centre for Interdisciplinary Studies in Society and Culture (CISSC). Principal Investigator: **Sowparnika Baslasamwinathan**. Co-investigators: **David Howes** and 3 others. \$2,000

[Axis 1 + Cluster A & E] †

[2023-2024]

§ 116 “Probing XR's Futures: Design Fiction, Bodily Experience and Critical Inquiry,” *Swiss National Science Foundation*. Principal Investigator: **Chris Salter** (Zurich University of the Arts & Concordia University). Co-investigators: **David Howes**, Sabine Himmelsbach, HeK (Haus der elektronischen Künste Basel), Lorenza Mondada, University of Basel, Pilar Orero, Autonomous University of Barcelona, Andreas Uebelbacher, Access for All (Spain). \$1,407,625 CAD

[Axis 4 + Cluster C + Focus 2] †††

[2023-2027]

§ 115 “A Tale of Two Cities in Three Parts: Exploring the emplacement of sound and affect.” Fonds de Recherche du Québec – Nature et technologie (FRQNT) / ExperiSens Centre collégial de transfert de technologies (CCTT) internship. Applicant: **Craig Farkash**. (SOAN PhD). Faculty supervisor: **David Howes**. \$7,000.

[Axis 2 + Cluster B + Focus 2] ††

[2023-2024]

§ 110 “Visual and Other Sensory Stimuli in Social Science Data Collection.” Faculty of Arts and Science FAS Chair Research Award. Principal Investigator: **Carolina Cambre**, \$6,000.

[Axis 4 + Cluster F] †

[2022-2023]

§ 109 “Names at the tip of the nose: naming, smell and truth,” Slovenian research agency (ARRS). Principal Investigator: Simon Hajdini (Philosophy, University of Ljubljana). Co-investigators: Lidija Šumah, Slavoj Žižek, Gregor Moder, Sebastjan Vörös, Jure Simoniti. Collaborators: **David Howes** (Concordia), William Mazzarella (U of Chicago), Eric Reinhart (Northwestern), Eric Santner (U of Chicago), Andrew Cutrofello (Loyola). \$431,310 CAD

[Axis 1] †††

[2022-2025]

§ 108 “Tracing ephemeral experiences in aesthetic practices: Immersive listening to workshop a neurodiverse phenomenology.” Insight Development Grant, Social Sciences and Humanities Research Council of Canada. Principal Investigator: **Melissa Park** (CSS Affiliate Member/McGill). Co-investigator: **Florian Grond**. Amount: \$75,000
[Axis 2 + Cluster C + Focus 2] †††
[2022-2024]

3.2 On-Going Research Grants and Projects

- \$ 219,000 Internal Funding – Concordia PI †
 - \$ 1,061,437 External Funding – Concordia PI ††
 - \$ 250,000 External Funding – External PI †††
- \$ 1,530,437 TOTAL**

§ 107 “Emerging Educational Policies in Times of Crisis: Visual Accountability in Mexico and Canada.” SSHRC Insight Development Grant. Principal Investigator: **Carolina Cambre**. Co-applicant: Elizabeth Ocampo Gomez (Instituto de Investigaciones en Educación Universidad Veracruzana, México). \$65,000
[FOCUS 1] ††
[2022-2024]

§ 106 “Atmospheres of Accusation: Law, Nature, and Colonial Governmentality. FRQSC Research Support for New Academics. Principal Investigator: Matthew Unger. \$40,238
[Axis 1 + Cluster A] ††
[2022-2025]

§ 105 “Decolonial Entanglements: Art, Technology and Critical Genealogies of Immersion.” FRQSC Soutien à la recherche pour la relève professorale. Principal Investigator: **May Chew**. \$45,000.
[FOCUS 2 + Axis 2] ††
[2022-2025]

§ 103 “Bidgala: Building a creative community that better meets the needs of artists today”. MITACS Accelerate Program. Principal investigator: **Jordan LeBel**. Co-investigators: Sam Tenenbaum, William Lande. \$90,000.
[FOCUS 2 + Axis 2] ††
[2022 – 2023]

§ 102 “Monitoring child-targeted food packaging: Tracking prevalence, nutritional quality, and marketing appeals in Canada.” Child Health and Wellness Grand Challenge Catalyst Award. PI **Charlene Elliott** (CSS Affiliate Member/UCalgary), Co-Applicants: Joel Reardon, Dana Olstad (UofC), Kim Raine (U. of Alberta), **Jordan LeBel** (Concordia). **\$50,000**
[FOCUS 1 + Axis 3] †††

[2022-2024]

§ 101 “Clandestine Transactions.” CISSC Working Group program. Principal applicants (co-directors): **Sowparnika Baliswaminathan**, **David Howes**. Co-applicant: Ishita Tiwary (Film). \$2,000.

[FOCUS 3 + Cluster E] †

[2022-2023]

§ 100 “Modal Olfactory Atmospheres: Experiential Design of Olfactive Environments.” Fonds de Recherche du Québec - Nature et Technologie [FRQNT] in association with ExperiSens Centre collégial de transfert de technologies (CCTT) stage de recherche (graduate student internship). Applicant: **Jayanthan Sriram**. Faculty supervisor: **David Howes**. \$7,000

[FOCUS 3] ††

[2022-2023]

§ 95 “Mobilizing disability survival skills for the urgencies of the Anthropocene.” Social Sciences and Humanities Research Council of Canada Insight grant. Principal Investigator: **Arseli Dokumaci**. Co-investigators: Pamela Block (Western), Cassandra Hartblay (Toronto). \$264,008.

[Axis 1 + Cluster C] ††

[2021-2025]

§ 92 “Metamorphosis: New Modes for Mixed Reality-based Theater focused on Climate Change.” Fonds de Recherche du Québec-Société et Culture [FRQSC] PRISME. Principal Investigator: **Chris Salter**. Co-investigator: Marcelo Wanderley (Music Technology, McGill). \$100,000

[Focus 2 + Cluster F] ††

[2021-2023]

§ 91 “Expressive Masculinities: Heterosexual Men and Emotional Expression in Popular Music.” SSHRC Insight Grant. Principal Investigator: **Marc Lafrance**. Co-investigator: **Lori Burns** (CSS Affiliate Member, UOttawa). Collaborator: **Matt Unger**. \$85,700.

[Axis 2 + Cluster D] ††

[2021-2025]

§ 90 “Primitivism and Interior Design: Art Deco, Hybridity and the Decolonization of the Modern Interior in France, 1909-1939.” SSHRC Insight Grant. Principal Investigator: **John Potvin**. \$91,174

[Focus 3] ††

[2021-2025]

§ 89 “Oral History Performance, Listening Acts and Transformative Justice.” SSHRC Insight Development Grant. Principal Investigator: **Luis Sotelo Castro**. Co-investigator: Cynthia Hammond. \$70,000

[Cluster A] ††

[2021-2023]

§ 84 “The Art of Visual Politics: Tracing, Making and Imagining Palestine.” FRQSC Nouveaux Chercheurs (Research Support for New Academics). Principal Investigator: **Nayrouz Abu Hatoum**. \$44,622
[Axis 1 + 2] ††
[2021-2024]

§ 82. “Centering Lived Experiences of HIV Surveillance.” SSHRC Insight. Principal investigator: **Martin French**. Co-investigator: Amy Swiffen and numerous collaborators. \$27,149.
[Cluster F] ††
[2021-2023]

§ 80. “Privacy Pedagogies for Virtual Play.” SSHRC Insight. Principal Investigator: **Martin French**. Co-investigators: **David Howes**, Sylvia Kairouz. Collaborators: Helen Nissenbaum (Cornell), Eva Monson (U Sherbrooke), Annie-Claude Savard (U Laval). \$98,554
[FOCUS 1] ††
[2021-2024]

§ 65. “Centre for Sensory Studies (university research centre) Operating Funds.” Concordia University OVRGS. \$210,000. Co-applicants: **David Howes, Bianca Grohmann**. \$210,000
[2020-2026]

§ 59. “Explorations in Sensory Design.” SSHRC Insight. Principal Investigator: **David Howes**. Co-applicants: **Constance Classen, Carmela Cucuzzella, Arseli Dokumaci, Bianca Grohmann, Aaron Johnson, Jordan LeBel**. Collaborators: Thomas Bastien (Montreal Museum of Fine Arts), Martine Lizotte (ITHQ), Suzanne Sauvage (McCord Museum), Henning Schmidgen (Bauhaus University), Charles Spence (Oxford), Stephanie Singer (BitterSuite, London), Ellen Lupton (Cooper-Hewitt Smithsonian Design Museum). \$297,000
[FOCUS 3] ††
[2020-2024]

§ 31. “The Cultural Sensorium: An Indigenous Ethnography of the Senses.” Australian Research Council. Principal Investigator: Jennifer Biddle (University of New South Wales). Co-applicants: **Chris Salter, David Howes**, and others. \$200,000.

5 ACTIVITIES

5.1 Lectures, Symposia and Conferences

The Centre hosted the SENSATION Virtual Lecture series during the Fall term of 2022-2023. It featured four talks:

***Sensitivity Training*, Erica Fretwell, November 4, 2022**

***Learning to Smell – a pragmatist view on perception*, Geneviève Teil, November 18, 2022**

***Crippling Storytelling: Disability, Accessibility, and the Senses*, Kathleen Sitter, November 24, 2022**

***Feeling Alive with the Far Right: Fight Club Culture and Fascist Vitalism*, Christopher E. Forth, December 2, 2022**

The talks were well attended, and the discussion was lively, much like at last year's virtual lecture series on the theme of SENTIENCE.

From May 3-6, the Centre hosted Uncommon Senses IV: Sensory Ecologies, Economies, and Aesthetics. There were 260 registered participants. The majority of the participants were able to attend in person. This was a welcome development: Uncommon Senses III, which took place in May 2021, had to be held exclusively on-line due to the pandemic.

There were four plenary addresses, by Kathleen Sitter, Constance Classen, Charles Spence and Hsuan Hsu.

Individual papers were grouped in sessions (three papers per session) and there were over 80 such sessions, as well as panels, workshops and roundtables, an opening reception on the Wednesday evening billed as "An Insipid Banquet" and a gala reception on the Friday called "A Feast for the Senses, Explosion of Flavours." The majority of the sessions were recorded and the

recordings have been posted on the Centre's You Tube channel. This archive, which is very rich and very stimulating, is directly accessible for everyone who registered for the conference. All others must request permission to be granted access

5.2 Seminars

The Talking Sense seminar ran throughout the year, beginning with a talk by Catherine Hamel on June 16 and culminating with a presentation by VK Preston on March 17.

***An Inverse Archaeology on the Turbulence of Silence: mapping the territory of a rumble*, Catherine Hamel, June 16, 2022**

***Islamic Sensory History: Notes on an Emerging Field*, Christian Lange, September 26, 2022**

***(Dis)placing Affect: Cold War Narratives in Ethnographic Collections at the Smithsonian Natural History Museum*, Sowparnika Balaswaminathan, February 10, 2023**

***Sensory Baroques: Coloniality and Archival Affect*, VK Preston, March 17, 2023**

Others Centre sponsored or co-sponsored events included:

***Toward a Sensory Ethnography of the Forest* (part of Orée des bois, presented by MEDIANE), David Howes, Nuria Alvarez Coll, Roseline Lambert, and Edith-Anne Pageot, June 19 and 22, 2022**

***Air, River, Sea Soil; a history of an exploited land* (AIM Lab), Artist Round Table, October 21, 2022**

***Chocolate Soiree: an interactive chocolate tasting and discussion*, Concordia Food Studies Working Group, October 27, 2022**

***Sensory Studies Book Launch*, David Howes, Erin Lynch, and William J. Buxton, December 12, 2022**

***Transgressive Sounds and Atmospheres: Artist Talk and Workshop*, Chantale Laplante, Hubert Gendron-Blais, and Rémy Bélanger de Beauport, February 3, 2023**

***An Ethnography of Nuit Blanche*, Erin Lynch, February 25, 2023**

***Why (Not) Eat Beef*, Concordia Food Studies Working Group, April 21, 2023**

***Driving in Palestine Book Launch*, Rehab Nazzal, April 20, 2023**

CENTRE FOR INTERDISCIPLINARY STUDIES IN SOCIETY AND CULTURE

Image credit: Details of images from *Inquiries into Human Faculty and Its Development* (1883), by Sir Francis Galton

According to the conventional wisdom, sensation occupies the lowest rung of the perceptual apparatus, next comes perception, and the crown goes to cognition. This virtual lecture series aims to upset this pyramid by arguing that far more goes on at the level of sensation than is commonly thought. It takes its cue from the English philosopher, scientist, poet and playwright Margaret Cavendish (1623-1673), who wrote: "[The] Eye is as knowing as the Ear, and the Ear as knowing as the Nose, and the Nose as knowing as the Tongue ... the Heads Braines cannot ingross all knowledge to themselves."

The four presenters will explore, inter alia, the cultural legacy of the science of psychophysics (Erica Fretwell) and the techniques of the Sensory Evaluation Research Laboratory (Geneviève Teil); the links between fighting and sensations of "aliveness" in far-right discourses (Christopher Forth) and what the creation of the Multisensory Storytelling Research Studio spells for the future of research with neurodivergent people (Kathleen Sitter).

All lectures and ensuing discussions will take place live on Zoom at the designated hour and last approximately 100 minutes. The December 2nd lecture by Christopher Forth will also be presented in-person, in Room H-1120 of the Hall Building. Please click on the titles for an individual registration link for each lecture. If you have any questions, please contact us at senses@concordia.ca

This virtual lecture series is curated by David Howes. It is sponsored by the Centre for Sensory Studies in collaboration with the Centre for Interdisciplinary Studies in Society and Culture (CISSC).

UNCOMMON SENSES IV: SENSORY ECOLOGIES, ECONOMIES & AESTHETICS

KEYNOTES

“Multisensory Storytelling, Disability, and Research Ethics”

Kathleen Sitter (Social Work, University of Calgary)

How might we address the inaccessibility of research designs that privilege certain ways of knowing and communicating? This paper explores the ways in which sensory methods can mitigate ableism in research designs. Following a description of crip theory, I will consider how connection, time and community can inform the axiological engagement of sensory modalities in understanding different ways of experiencing the world through first-person accounts. As an exemplar, I will focus on the creation of Multisensory Research Studio, a space where researchers explore different sensory methods with and alongside the disability community and the ways in which disability and access inform the design, location, equipment, and community structure.

17h00-18h30, Wednesday, 3 May 2023,
Ground Floor, EV Building, room EV-1.605
(and on-line)

Keynote lectures are free and open to the public as well as conference participants, but space is limited. For all other sessions, interested persons must register on-line.

Conference website: <http://www.sensorystudies.org/events-of-note/>

“Sensitive Ecology”

*Constance Classen
(Centre for Sensory Studies, Concordia University)*

This talk will explore how bringing concepts of sensibility into representations of nature and strategies of sustainability can help overcome ideologies which maintain a misguided and harmful human/nature divide. A range of examples conveying conventional views of the ‘natural’ world and its non-human inhabitants as ‘things’ to be managed and commodified will be presented and analysed. These examples will then be contrasted with initiatives which bridge the conceptual divide between the ‘human’ and ‘natural’ worlds and move from mechanistic paradigms of ecological systems to sensate models portraying the relationships among living beings and the environment as animated by networks of sensibilities. This investigation will draw on insights from sensory studies to consider how the notion of a sensitive ecology can be productively applied in the social sciences and humanities as well as in the field of environmental studies.

14h00-15h30, Thursday, 4 May 2023, 9th Floor,

UNCOMMON SENSES IV: SENSORY ECOLOGIES, ECONOMIES & AESTHETICS

KEYNOTES

“Who’s In Control of Your Sensorium?”

Charles Spence
(Experimental Psychology, University of Oxford)

A large body of robust scientific evidence now demonstrates just how profoundly the multisensory atmospheres of the places in which we live, work, sleep, and play can influence our social, cognitive, and emotional well-being, often without our being aware of the hows or wherefores. At the same time, however, marketers have long been deliberately modifying the multisensory atmosphere to bias our behaviour – making us linger for longer, buy more, not to mention consume more, more rapidly (think ‘sensory marketing’ and the ‘experience economy’). But just how worried should we be by the commercialization of the multisensory sensorium? And what can be done to take back control of our environments, one sense at a time? Think here only of the recent rise of sensory wellness solutions, biophilic design, and “sensehacking.

18h00-19h30, Friday, 5 May 2023, 9th Floor,
Molson Building, room MB 9A-B (and on-line)

“Smellscape, Distributed Memory and Social Justice”

Hsuan Hsu
(English, University of California at Davis)

This paper revisits J. Douglas Porteous’s influential concept of “smellscape” (which frames smell as an immersive and emotive quality of place) in light of recent interdisciplinary scholarship on the political, social, and affective valences of olfaction. Following theorizations of the “distributed mind,” it will consider how smellscape functions as a contested medium of distributed memory and distributed affect, where deodorized atmospheres and commodified scents obscure (or caricature) the place-based olfactory associations of racialized and colonized people. This paper will focus on *In Sensorium: Notes for My People* (2022), a memoir by the queer, Muslim, diasporic perfumer and writer TANAIŠ that explores the personal, political, and postcolonial intimacies of olfactory “notes” while detailing a perfuming practice that upholds critical, scent-based memories within and against colonial smellscape.

14h00-15h30, Saturday, 6 May 2023, 9th Floor,
Molson Building, Room MB 9A-B (and on-line)

Keynote lectures are free and open to the public as well as conference participants, but space is limited. For all other sessions, interested persons must register on-line.

SENSATION LECTURE SERIES

Sensitivity Training

Erica Fretwell

Friday, 04 November 2022
11:00-12:40 EST, [Webinar Registration Link](#)

This talk takes the primary classroom as a point of entry into the history of the haptic. There, a Progressive-era program called “sensitivity training” first flourished. Originating in nineteenth-century psychophysics, sensitivity training – the refining of the perceptual faculty – was popularized as a pedagogical method by Maria Montessori, who located touch at the core of her program for early childhood education: children trace letters on textured sandpaper, acquiring a “feel” for the sound and shape before all else. By revisiting Montessori’s cultural aims, as well as situating her program along a scientific history of touch originating in philosophical and philanthropic discussions of blindness, this talk suggests that the judgments typically taught in the college classroom inhabit a continuum of “sensitivity training” that begins in the general primary classroom, where touch discrimination and language are entangled in and as – to borrow from Henry James – a “grasping imagination.”

Erica Fretwell is associate professor of English at the University at Albany, SUNY. Her research and teaching interests include nineteenth- and twentieth-century U.S. literature, the history of science and medicine, disability studies, and affect theory. She is the author of *Sensory Experiments: Psychophysics, Race, and the Aesthetics of Feeling* (Duke 2020), and she is co-editing a special issue of *American Literature* with Hsuan Hsu on “Senses without Subjects.” Her essays have appeared in the journals *J19* and *American Literary History*, and in the volumes *Timelines of American Literature*, *The New Walt Whitman Studies*, *The Cambridge Companion to Literature and Food*, and *The Cambridge Companion to American Literature and the Body*.

SENSATION LECTURE SERIES

Crippling Storytelling: Disability, Accessibility, and the Senses

Kathleen Sitter

Thursday, 24 November 2022
1:00-2:40 PM EST, [Webinar Registration Link](#)

For many people, research designs – including participatory and arts-based research – are inaccessible. How can we address the inaccessibility of research that privileges certain ways of knowing and communicating? How might we prioritize different sensory methods while creating designs that mitigate ableism? The creation of the Multisensory Research Studio is a space where researchers explore different sensory methods with and alongside the disability community. This lecture will describe the background of the Multisensory Research Studio and the ways in which disability and access inform the design, location, equipment, and community structure. What follows is an example of how crip theories of connection, time, and community inform the engagement of sensory modalities in understanding different ways of knowing and experiencing the world through first-person accounts

Kathleen Sitter is the Canada Research Chair in Multisensory Storytelling in Research and Knowledge Translation and an associate professor in Social Work at the University of Calgary. She leads the *Multisensory Studio* lab, and her work focuses on creating accessible multisensory research designs in collaboration with the disability community. She has published in national and international journals, and her research includes over 200 arts-based works such as 4D installations, short documentary films, theatre, cartoons, and photography, with over 100 invited and juried screenings/referred exhibitions.

SENSATION LECTURE SERIES

Learning to Smell – a pragmatist view on perception

Geneviève Teil

Friday, 18 November 2022
11:00-12:40 EST, [Webinar Registration Link](#)

As figured in the title, this conference will focus on learning to smell. Yet, how is it possible to learn to smell? We all can smell. There is no need to learn it. Furthermore, if perception results from experiential “faith”, as Merleau-Ponty puts it, it’s not something you perform and can learn.

By contrast, the traditional representational theory of perception interprets it as the processing of the sensory information that binds a subject to its environment. From this particular point of view, the process of smelling can be altered and changed by manipulating the influences that affect it. This is the purpose of blind tests namely. Still, here too, smell cannot be learnt.

In Anthropology, smell is the support of cultural significations and values. It is structured by language and cultural classifications, which are embodied, but not learnt. Nonetheless, perfumers, olfactory experts, and wine amateurs attend smell classes to learn to smell.

To try to understand what smell learning consists of, and what is at stake while learning to smell, I will rest upon field studies in smelling classes and panels. The detailed study and comparison of these two smelling devices suggest an interpretation of learning to perceive where learning is a process of destabilization and reestablishment of a modality of experience we call ‘perception’.

Geneviève Teil is a sociologist at INRAE-AgroParisTech-Paris Saclay University. She is interested in the place of objects within societies, and more precisely in their different modes of existence within collectives. She started by studying food product quality markets, wine taste and tasting namely, and progressively enlarged this focus to environmental qualities, other products (cheese), and beings (microbes).

SENSATION LECTURE SERIES

Feeling Alive with the Far Right: Fight Club Culture and Fascist Vitalism

Christopher E. Forth

Friday, 02 December 2022
11:00-12:40 EST, [Webinar Registration Link](#)
Virtual and In-person (Room H-1120, Hall Building)

In 2019 *The New Yorker* ran a short piece entitled “The Men Who Still Love ‘Fight Club’” referencing the enduring legacy of the 1996 novel by Chuck Palahniuk and its 1999 film adaptation by David Fincher. Focused primarily on American society, the article fails to mention *Fight Club’s* appeal to many in Europe and elsewhere who have also been attracted by its aggressive masculinism and critique of consumer lifestyles. As a first step into a strange and sometimes disturbing world – what I refer to as “Planet Fight Club” – this presentation explores how Palahniuk’s narrative features in far-right political culture in Europe and America today. Using selective examples from France, Germany, Austria, Italy, and the United States, particularly from representatives of the pan-European youth movement Generation Identity, it proposes that “fight club culture” articulates enduring historical tensions between masculinity and modernity while inquiring practical methods of preserving – sometimes violently – the supposed integrity of white European culture. As opposed to what is often described as a slumbering society of de-vitalized white males, fight club culture promises a sensory and experiential regeneration of European manhood, a new vitalism in a modern world often described as “dead.”

Christopher E. Forth is the Dean’s Professor of History at the University of Kansas (USA). His interdisciplinary research concerns the cultural history of gender, sexuality, the body, and the senses (with an emphasis on modern France, Britain and America) as well as European intellectual and cultural history. The author or editor of twelve books, including *Zarathustra in Paris: The Nietzsche Vogue in France, 1891-1918* (2011), *The Dreyfus Affair and the Crisis of French Manhood* (2004) and *Masculinity in the Modern West* (2008), Forth’s most recent book is *Fat: A Cultural History of the Stuff of Life* (2019). He is currently working on two book projects tentatively entitled *Life is Elsewhere: Feeling Alive in the Modern World* and *Planet Fight Club: Masculinity, Modernity, and the Global Far Right*.

Catherine Hamel

An Inverse Archaeology on the Turbulence of Silence: mapping the territory of a rumble

Catherine Hamel

Thursday, 16 June 2022
11:00 – 13:00
Room H-1120, Hall Building

The low rumble that emanates from the infrastructure of the modern environment, and eludes city policies and procedures, is not a noise as such. Yet its very silence, or infra-audibility, can be used to survey territories. The relationship between the visual world created by such methods and the actualities of the lived world can be potentially reorganized through the role of creative explorations in an archeology of perception. Why archeology? Archeology because excavated partial discoveries are curated to allow the viewer to extrapolate a realm. Reversed, this reverberation out of the ground creates social relations not as a thing to be looked for in carrying out the research, rather it is what is used to do the looking. In this lecture (which has a strong interactive component), a set of tools are presented as facilitators to investigate the built environment in order to engage it in less prescribed and predictable ways. It is a commitment to exploring society from within experience and values rather than objectifying it from the standpoint of the ruling relations. Hot, bothered and the wrong kind of dirty, such is the training of mapping the territory of a rumble.

Catherine Hamel is Associate Dean, Academic at the *School of Architecture, Planning & Landscape* at the University of Calgary, Canada. Her interests lie in the repercussions of objects made in their ability to activate space and its inhabitants towards a more just society. Born in Beirut, Lebanon, themes investigated include identity and estrangement in the context of post-war reconstruction and exile, memory in the scarred body and the voicing of political experiences in public space. What agitates her is not the sides people take, but the lines they draw in order to be able to take them.

This is a hybrid event. We encourage in-person attendance because it is part workshop. However, you can participate online via zoom by registering here: bit.ly/3IHNXHW

CENTRE FOR SENSORY STUDIES

TALKING SENSE LECTURE SERIES

Islamic Sensory History: Notes on an Emerging Field

Christian Lange

26 September 2022
11:30 AM-12:50 PM; [Registration Link](#)
Virtual and In-Person (H-1120, Hall Building)

The sensory turn in many areas of the humanities has so far failed to make a decisive impression on the study of Muslim cultures in historical perspective. However, in the last couple of years there has been a rise in interest in historical manifestations of the Muslim sensorium, as is demonstrated by a series of symposia devoted to the topic on both sides of the Atlantic, several large-scale research projects, as well as multiple ongoing publication projects, including a [2022 Special Issue of The Senses & Society](#) and a multi-author *Reader in Islamic Sensory History* (forthcoming in Brill's *Handbook of Oriental Studies* series, ed. Adam Bursi and Christian Lange). In this talk, I aim to summarize these recent developments, provide insights from a number of case studies, describe the challenges involved, and formulate some ambitions for the future study of Islamic sensory history.

Christian Lange (PhD Harvard, 2006) is Professor of Arabic and Islamic Studies at the University of Utrecht and a fellow of the Royal Netherlands Academy of Art and Sciences. His research focuses on premodern Islamic intellectual and cultural history, particularly in the areas of Islamic eschatology, Islamic law and legal theory, Islamic mysticism, and the Muslim sensorium. Since joining Utrecht University in 2011, he has been the principal investigator of the ERC Starting Grant project 'The here and the hereafter in Islamic traditions' (HHIT, 2011-2015), as well as of the ERC Consolidator Grant project 'The senses of Islam' (SENSIS, 2017-2022).

CENTRE FOR SENSORY STUDIES

Toward a Sensory Ethnography of the Forest

As part of *Orée des bois*, David Howes and his guests reflect on what a sensory ethnography of the forest might entail.

Image credit: Roseline Lambert,
The view from the tree
Tuusula, Finland

For the Intervention on 19 June, the audience is invited to join in a series of mini-sense experiments with forest materials: An installation piece by [Nuria Alvarez Coll](#) involves participants handling finished and unfinished (or 'natural') pieces of wood while blindfolded and then discussing their impressions and arranging the wood samples on a scale once the blindfolds come off. The poet-anthropologist [Roseline Lambert](#) will present a poetic ethnography of the Finnish sauna, centring on the question: How does one bathe in a tree?

The event on 22 June will involve a conversation between Howes and [Edith-Anne Pageot](#). Their discussion will revolve around the philosophy of the forest and art practice of Domingo Cisneros, an Elder of the Indigenous art scene. Cisneros is the creator of such works as *Laurentian Bestiary*, author of *La guerre des fleurs*, and a leading exponent of boreal gastronomy.

Interventions

Sunday 19 June 2022

14:00-15:30

David Howes,
Nuria Alvarez Coll, and
Roseline Lambert
(in French)

The installation *Orée des bois*, activities with guests and a mobile climate station, is presented by the Canada Research Chair in Arts, Ecotechnologies of Practice and Climate Change (MÉDIANE).

1455 de Maisonneuve Boulevard West, Montreal

Refreshments will be served, kindness of The Hive.

The event will also be live on Zoom.

Please use this link: <https://concordia-ca.zoom.us/j/82054832233>

There will be copies of the books on hand for you to buy.

If you cannot make it to the party in person, you are welcome to order the Howes and Buxton books online at a 25% discount by going on the University of Toronto Press website to order and entering the code **HOWES25** or **INNIS25** in the 'coupon' box before you check out.

CENTRE FOR SENSORY STUDIES

TALKING SENSE SEMINAR

(Dis)placing Affect: Cold War Narratives in Ethnographic Collections at the Smithsonian Natural History Museum

Sowparnika Balaswaminathan

Friday, 10 February 2023

12:00-14:00

Zoom Registration Link: bit.ly/3CJ2e9e

Ethnographic collections at natural history museums are assemblages of awkward objects (Lehrer & Sendyka 2019). Embodying a combination of the scientific intention of their collectors, the imperialistic context of their translocation, and the colonial racism underlying the concept of cultural exhibiting, these objects tend to be narrativized with brevity even when the curatorial intent is to contextualize and problematize their heterotopic reality. Even more obfuscated are the affective components of these collections, which are elided partly because of the difficulties of locating the intimate in these objects deadened by classification, but also because of the extant curatorial emphasis on wonder and curiosity. In this talk, I juxtapose the intimate and the political in a particular ethnographic collection at the Smithsonian Institution National Museum of Natural History (NMNH), and ask what narratives are made possible when ethnography is unanchored from its "culture area" setting, and if an emphasis on exploring the affective relations between cultural objects and their communities could open up anticolonial possibilities.

When the nation state of Tibet was invaded and occupied by the People's Republic of China in 1950, the millions of refugees who found asylum in India had to find creative and grim ways to survive. In this, they were assisted by the New Delhi Charity Godown Society, a women-led philanthropic organization in India, that provided monetary assistance and infrastructural aid to Tibetan refugees by brokering the transfer of their heritage and religious possessions to museums and collectors. The NMNH was one of the institutions that acquired a collection, which is labeled in its catalogues as representing "Tibetan culture and religion". However, in this paper I argue that the objects of this collection, when read with their associated archival materials, are also representative of the invasion and occupation of Tibet, a political act wrought with violence, and the distress of a fleeing people, an affective context mediating between the refugees and the world (Cifor 2016:8). Through an exploration of the correspondences between well-meaning members of the Godown Society, academically curious curators of the Smithsonian, and the consequent documentations in the National Anthropological Archives, I illustrate how an analysis of the affective components of such negotiations reveal the underlying political valences and relations emblematic of the Cold War era neoliberalism. Lastly, I contend that such close readings of archives could provide an anticolonial alternative to curation, which in turn could enable decolonial processes of recognition and reparation.

Sowparnika Balaswaminathan is an Assistant Professor in Religions and Cultures at Concordia University, Montreal. She received a PhD in anthropology from the University of California, San Diego, and was a Peter Buck postdoctoral Fellow at the Smithsonian National Museum of Natural History, Washington DC. Her work examines the politics of heritage, the ethics and aesthetics of artisanal labor, and religious art traditions in India.

CENTRE FOR SENSORY STUDIES

TALKING SENSE SEMINAR

SENSORY BAROQUES: COLONIALITY AND ARCHIVAL AFFECT

VK Preston

Friday, 17 March 2023

12:00-14:00

Registration Link: [http://bit.ly/3YV3v5](https://bit.ly/3YV3v5)

Manuscripts describing early decades of colonization in Turtle Island (North America) invoke affects and the senses alongside taxonomies of the human, more-than-human, and nonhuman. This talk investigates translocations of gender and ontological categories, often in defamiliarizing declensions, through the sensorium and traces of their scripts of orientation. By investigating early Indigenous and French materials in ink and paper records, drawings, and treatises, this work turns to questions of classification, complication, being, and ornament in long histories of depicting the more-than-human, performative, and monstrous in kinesthetic, colonial documents.

VK Preston is an Assistant Professor in the department of History at Concordia University. As a cultural historian of the Early Modern period, VK's research examines performance archives that reveal charged circulations of both written and unwritten practices. In dance studies and in research creation, VK works alongside artists as a practice of critical research ethics and methodology, investigating histories of the senses and embodiment through experiential, narrative approaches. VK's approaches engage with histories of the Atlantic world, and of Turtle Island, addressing genealogies of racial capitalism, decolonization, non-binary gender, historical memory, and translation. VK is a member of the Centre for Oral History (COHDS), the Centre for Interdisciplinary Society and Culture (CISSC), Feminist Media Studio, and Le Parc (Milieux) as well as being a fellow of the Simone de Beauvoir Institute (Concordia University) and the Mark S. Bonham Centre for Sexual Diversity Studies (University of Toronto).

CENTRE FOR SENSORY STUDIES

TRANSGRESSIVE SOUNDS AND ATMOSPHERES Artist Talk and Workshop

Friday, 3 February 2023

10:00 AM – 3:00 PM EST

Milieux Institute Resource Centre, EV 11.705 & Virtual

Concordia University, Montreal

Zoom Link: bit.ly/3XGTk10

On February 3rd, the research-creation working group "Transgressive Sounds and Atmospheres" hosts a one-day workshop to explore ambiances, atmospheres and the transgressive nature of sounds. The workshop aims at investigating sound's and music's non-conventional features, which limits them to only sonic events by dwelling on how everyday life, politics, and political actions impact our sonic environment, how urban policies change the sounds of a place, how we listen and what is the connection between sound and other senses.

The event consists of three artist talks by Chantale Laplante, Hubert Gendron-Blais and Rémy Bilanger de Beauport where each artist elaborates on how they engage with sound and music based on their experimental public performances held at Centre St. Jax on May 24th, 2022. The artist talks will take place in the morning followed by a discussion in the afternoon.

Celebrate Halloween & Join us for a delicious Chocolate Soirée

Thursday, October 27 *** 6:30PM – 8:00PM *** MB 9th floor, Room EG

What happens when you take a popular food like chocolate and interrogate it from different perspectives? The Concordia Food Studies Working Group invites you to find out during this chocolate soirée.

Theresa Ventura (History) will explore chocolate production and consumption in the context of Euro-American plantation empires and Jordan LeBel (Marketing) will explain the manufacturing process from bean to bar.

The event will include an interactive tasting and discussion of artisanal chocolates from Quebec.

Attendance is free but places are limited, **RSVP before Oct 25** at foodstudies@concordia.ca

Door prize sponsored by <https://www.etatdechoc.com>

6 RESEARCH ORIENTATIONS

6.1 Axes & Clusters

As contemplated in the Centre's initial proposal for university recognition and explained on the Centre website (in addition to being visualized in the CSS Organigram of Research Concentrations - see below), there are four main axes to our research.

- **AXIS 1: CULTURE AND THE SENSES.**

The study of the social life of the senses in history and across cultures and geographies.

– Classen, Howes, LeBel, Lafrance, Stolow, Kaell, French, Cambre, Unger, Potvin, Dokumaci, Cucuzzella, Chew, Abu Hatoum, Sicotte, Sotelo

- **AXIS 2: MULTISENSORY AESTHETICS.**

The study of aesthetics in history and across cultures; the creation of intermedia/multisensory artworks and environments.

– Salter, Classen, Cambre, Unger, Potvin, Dokumaci, Chew, Abu Hatoum, Sicotte, Sotelo

- **AXIS 3: SENSORY DESIGN AND MARKETING.**

The study of the sensory turn in the design of objects and spaces and the 'race to embrace the senses' in contemporary marketing practice.

– Grohmann, Le Bel, Howes, Classen, Johnson, French, Salter, Potvin, Cucuzzella

- **AXIS 4: SENSORY ENGINEERING AND COMMUNICATION.**

The study of technologies as extensions of the senses; the development of technologies for expanding the sensorium in innovative ways.

– Johnson, Salter, Howes, Stolow, French, Dokumaci, Chew

In addition to the Axes there are six Clusters, which represent emergent areas of research concentration, where the interests of 3 or more Members coalesce:

Cluster A: Sensori-Legal Studies

– Howes, Lafrance, Classen, French, Unger, Abu Hatoum

Cluster B: Emplacement

– Howes, Unger, Cucuzzella, Abu Hatoum, Chew

Cluster C: Disability and the Senses

– Johnson, Classen, Grohmann, Lafrance, Howes, Dokumaci

Cluster D: Gender and the Senses

– Classen, Lafrance, Potvin, Abu Hatoum

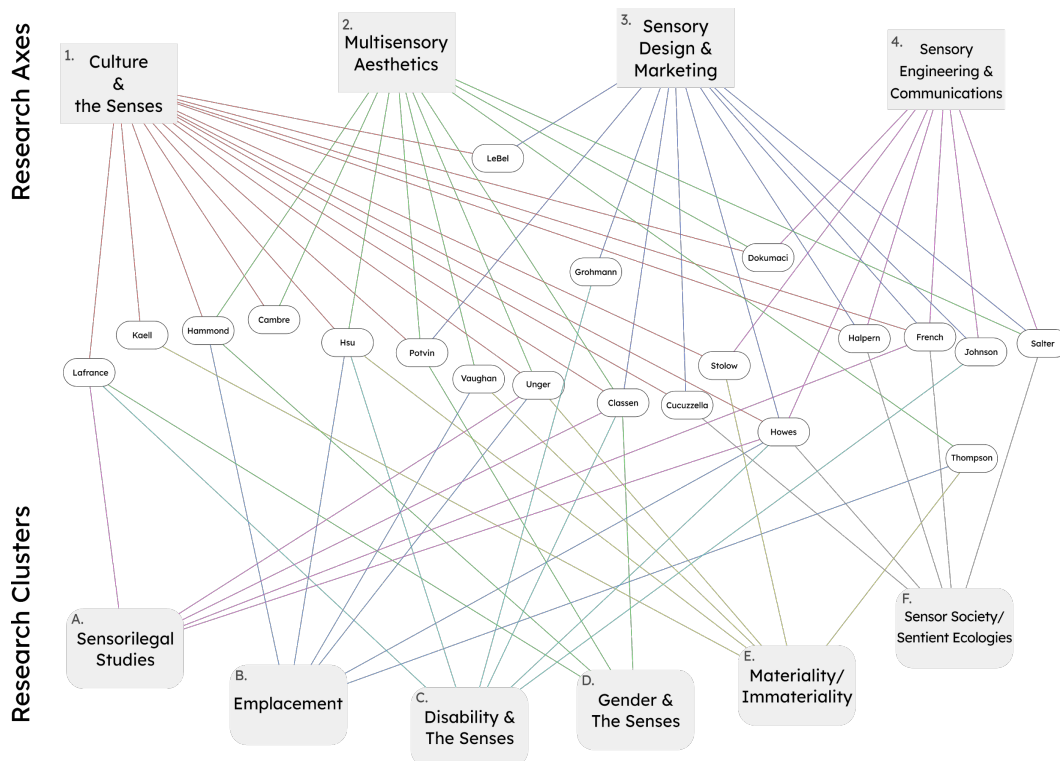

Cluster E: Materiality and Immateriality

– Stolow, Unger, Sotelo

Cluster F: Smartness, the Sensor Society and Sentient Ecologies

– Salter, Howes, French, Cucuzzella

6.2 Organigram

6.3 Graduate Student Training

Concordia already has a doctoral program in Sensory Studies. This research area has been featured as one of the “Research Currents” within the Individualized Programs (SIP) and the Humanities Doctoral Program (HUMA) since the Fall of 2007.

<http://www.concordia.ca/sgs/programs/individualized/research-currents.html>

It is possible to graduate with a concentration in sensory studies in other doctoral programs as well, such as the Ph.D. in Marketing, the Ph.D. in Communication Studies, and the Ph.D. in Social and Cultural Analysis.

A number of students at the Master’s level have also pursued research in sensory studies, either through the M.A. program in Social and Cultural Anthropology or the INDI M.A. program.

The benefits of student membership include: supervision for independent studies courses related to degree requirements; participating in both large and small research and research-creation projects (and the joint publications and/or installations that result from these), access to funding in the form of research assistantships; and, access to conference and research travel support.

Research Assistantships take many different forms. For example, Craig Farkash (SOAN PhD) serves as the Coordinator of the Centre; Jayanthan Sriram (HUMA Ph.D.) is the Editorial Assistant for *The Senses and Society* journal; and, numerous student members are attached to diverse research projects directed by faculty members of the Centre. All of these opportunities provide vital training in the research methods and practices of the expanding field of sensory studies.

Student members of the Centre are also themselves contributing to expanding the frontiers of sensory studies through their many publications (see section 4.2.2) and conference presentations (see sections 4.4.2)

7 DEVELOPMENT PLAN (2020-2026)

The Centre has a long-term development plan, which involves advancing on all 10 fronts (i.e. the 4 Axes and 6 Clusters). Nevertheless, during the Fall of 2019, in preparation for submitting our proposal for renewal, we also devised a medium-term development plan. Central to this plan is the development of a Partnership Grant (PG) application to the SSHRC for submission in two-to-three years' time. The medium-term plan also envisions 10 new projects to be rolled out over the intervening years (see below)

Central to the proposed PG application is the establishment of a research network called the *Sensory Collaboratory*. To quote from the minutes: “The main objective of the proposed *Sensory Collaboratory Research Network* is to explore the actual and potential role of the senses in education, exhibition (multimodal art and museology), design and urbanism and to draw out the implications of a sense-based approach, such as we promote, for the enhancement of existing techniques, practices and technologies in these four domains. Outcomes will include a series of methodological treatises, case studies, exhibitions, websites, workshops, international conferences, and summer schools for the training of the next generation of scholars attuned to the senses.” The four Foci of the PG application are as follows:

1 Sensory Education.

2 Exhibition (Multimodal Arts and Museology)

3 Sensory Design

4 Sensorial Urbanism

Note: The Foci represent areas of research concentration *within* the four Axes, unlike the Clusters which cut across the Axes

In order to lay the foundation for a successful PG application, we made a number of changes to the membership and modus operandi of the Centre. These changes were described in the corresponding section of the 2019-2020 Annual Report.

It must be said that we were sobered by the outcome of the 2020 and 2022 SSHRC PG competitions. Neither the application entitled RE-CREATE, developed by Chris Salter for the

2020 round, nor the revised version of this application submitted by Alice Jarry for the 2022 round (both of which included diverse Centre members as co-investigators) met with success.. We are studying these échecs for clues and will be revising our strategy accordingly.

The following is a list of research projects and/or grant applications which are in development. The idea is that they will contribute to the success of the PG application by demonstrating a strong record of previous collaboration. However, all these projects are interesting and worthwhile in their own right, too.

§ 1010. “The New Sensorium: Sentience and Intelligence in the Digital Age.”

[SSHRC Insight, PI: TBD, for submission in October 2023]

[Cluster F]

This project will probe the technologization of sentience and intelligence in the digital age, an age in which sensors have supplanted sense organs and computation has taken over from cogitation. Concordia co-applicants potentially include: Howes, French, Cucuzzella, Cambre

§ 1009. “Multimodal Art and Museology.”

[FRQSC soutien aux équipes, PI: TBD, for submission in October 2023 - postponed]

[Focus 2]

This project capitalizes on a string of previous projects centring on the sensory history of the museum and art gallery and the design of “performative sensory environments.” Concordia applicants: TBD. We plan to involve diverse local museums, such as the McCord Museum and Montreal Museum of Fine Arts and design studios such as Moment Factory as research partners.

§ 1008. “Sensorial Urbanism: Charting the Urban Sensorium.”

[SSHRC Insight, PI: TBD, for submission in October 2022 - postponed]

[Focus 4]

Centre members have a long history of collaboration with the Canadian Centre for Architecture (CCA), most notably Howes and Classen, and Salter and Halpern, and Cucuzzella. The Centre is also part of the Next-Generation Cities Institute, so there is a great deal of momentum behind this research direction. It will be a focus of discussion at the above-mentioned meeting in early August.

§ 1007 “For an Aesthetics of the ‘Other’ Senses: Smell, Taste, Touch, Movement.”

[SSHRC Partnership Development, PI: Hsuan Hsu, for submission in October 2022]

[Axis 2 + Focus 2] **

This project was to build on the Insight grant application which was submitted by Hsuan Hsu to the SSHRC in October 2019 – and met with success.

Note: Hsuan Hsu left Concordia in 2020 to take up a position at University of California at San Diego, so this initiative has had to be abandoned.

§ 1006 Sensing Atmospheres

[SSHRC Insight, PI: Hillary Kaell, for submission in October 2022]

[Cluster F + Focus 4] **

The atmosphere or climate and peoples' sensitivities to the seasonal cycle, extreme weather events, and climate catastrophe (never mind climate change) are all issues that have emerged as important foci in the work of Unger, Cucuzzella, Stolow, Dokumaci and Howes as well as Kaell (now an affiliate member).

Note: Unger (as PI), together with Stolow, Howes and Kaell submitted an application to the SSHRC Insight grant program in October 2021 (one year earlier than planned), but it was turned down. A revised application with Park and Grond as well as Howes as co-investigators which was submitted in October 2022, was also turned down. However, an application to the SSHRC Insight Development grant competition in February 2023 with Grond as PI and Unger, Howes and Park as co-investigators did prove successful. It is called "Sensing Differently."

§ 1005 "Exploring the Multimodal Transmedia Storyworlds of Popular Music."

[SSHRC Insight, PI: Lori Brown (UOttawa), for submission in October 2021]

[Axis 2 + Focus 2] ***

This project grows out of the longstanding collaboration between Lori Brown (Music, UOttawa) and Marc Lafrance (see § 1, 26, 58). Other Concordia co-applicants include Unger and Howes. In the new millennium, many metal artists have espoused progressive rock aesthetics in elaborate, concept-driven transmedia works that include books, artwork, theatrical staging, and films. The project will work toward the development of an interpretive model for understanding these contemporary works while creating an immersive platform for spectators to experience and understand the materials and the implications of the storyworlds.

Note: This project has been cancelled, since the team of Lafrance and Brown were successful with the other application to the SSHRC Insight Grant program they submitted in October 2020, entitled "Expressive Masculinities: Heterosexual Men and Emotional Expression in Popular Music" (§ 91). Unger is a collaborator on the latter project.

§ 1004 "Sensory Curriculum Theory & Practice 2.0: Unsettling Knowledge Hierarchies."

[SSHRC Partnership Development, PI: Carolina Cambre, for submission in October 2021]

[Focus 1] **

This project is a sequel to the grant applications which Carolina Cambre submitted to the SSHRC New Frontiers of Research in October 2019 and again in October 2020 (neither of which met with success, unfortunately). Concordia co-applicants include: Howes and Classen. Other co-applicants include: Carey Jewitt (Knowledge Lab, University of London), Fiona Macdonald (UBC Okanagan), Melissa Park (Occupational Therapy, McGill).

Note: Undaunted, Cambre submitted a further application to the New Frontiers of Research Explorations program in July 2022. Unfortunately, it did not meet with success either.

§ 1003 “Feeling Lucky: Sensory Ethnography of Gambling Casinos and Gaming Apps.”
[SSHRC Insight, PI: Martin French, for submission in October 2021]
[Focus 3] **

This project builds on a pilot project (§ 29 - jointly funded by Martin French’s chercheur-boursier grant and the CSS) and also complements § 54 (where the Montreal Casino figures as one of three field sites). Concordia co-applicants include Howes.

Note: This research continues, but it is supported by internal funds (from French’s chercheur-boursier and from the Centre). French decided not to submit a grant application for this project in 2021 because he was successful with another grant application, one he submitted to the SSHRC Insight Grant program in October 2020, entitled: “Privacy Pedagogies for Virtual Play” (§ 80). Howes is a co-investigator on the latter project.

§ 1002 “Rethinking the Theory of Affordances.”
[SSHRC Insight, PI: Dokumaci, for submission in October 2020]
[Focus 3] ***

This project grows out of Arseli Dokumaci’s critique of conventional affordance theory from the standpoint of Critical Disability Studies. It complements § 59 where Dokumaci’s theory has already been incorporated into the research methodology of the project – namely, sensory ethnography. Concordia co-applicants include Howes and possibly Johnson.

Note: This project has been postponed and may be abandoned, since the focus of Dokumaci’s research has shifted from the theory of affordances to disability and climate justice.

§ 1001. « L’impact de la perception et l’attention visuelle sur le traitement de l’information, l’évaluation et les choix des consommateurs. »
[Renewal of § 21 FQRSC soutien aux équipes de recherche, PI: Bianca Grohmann, for submission in October 2020]
[Focus 3]. **

This application will support research on the effects of product-based and environmental visual cues on consumers’ attention and information processing in a marketing context. This investigation will have implications for the design of products and environments that better serve consumers with age-related visual impairments, consumers with multiple sensory impairments, and consumers with dyslexia. Other team members include: Johnson, Walter Wittich (Optometrie, UdeM), Onur Bodur (Marketing, Concordia).

It was resolved by Grohmann and Johnson not to pursue this project, due to their many other prior research commitments.

Time has been reserved in the agenda for the upcoming Annual General Assembly in August 2023 to explore other possible avenues of collaboration among Centre researchers

Various research teams attached to the Centre, such as the Explorations in Sensory Design research team (directed by Howes, with Classen, Cucuzzella, Dokumaci, Grohmann, LeBel and Johnson as co-investigators and countless students as RAs) and the Sensing Differently team (directed by Grond, with Unger and Howes as well as CSS Affiliate Member Melissa Park as co-investigators) have developed strength in the study of atmospheres. In recognition of the Centre's growing research reputation in this area, we were approached by Yuho Hisayama of the Kobe Institute for Atmospheric Studies (KOIAS) to enter an Agreement of Friendship and Cooperation.

We took Professor Hisayama and Kobe University up on this invitation, and the Agreement was signed on 5 May 2023. We have great hopes for this exciting new collaboration.
